CVX-4 Viewing Area

48x130"/122x330cm

CVX-3/SC

Graphiclite 100 Lamps

Graphiclite® 100 lamps are manufactured with a unique blend of fluorescent phosphors. They are unequaled by any other 5000K lamp in the industry and produce a true full-spectrum white light that renders colors with the highest degree of accuracy and efficiency. These lamps produce an actual system CRI approaching 95.

Munsell N8/ Gray Surround

The CVX units are supplied with standard Munsell N8/ gray interior and sidewalls to help create a better viewing environment.

Lamp Monitoring System

LiteGuard® II is a critical quality control monitor, a backlit liquid crystal display of lamp hours used and lamp hours remaining on the daylight source. The LiteGuard II also indicates warm-up time and the hours remaining until recommended relamping.

Symmetrical Luminaire

The symmetrical luminaire on the CVX unit directs light through a diffusion lens in a uniform pattern to ensure equal light coverage over the viewing table and back wall.

Additional Features

- True 5000 Kelvin color temperature lighting
- Uniform illumination
- High-efficiency reflectors
- Neutral diffusers that will not yellow
- Print bar for the positioning of an image vertically on the back wall for direct comparison to the press sheet on the horizontal viewing area
- Shipped disassembled to reduce costs

CVX-3

ISO 3664:2009

This highly technical set of specifications enables lighting manufacturers to design, test and certify color viewing systems. The standard specifies a set of five conditions which must all be present in order to assure the benefits of the standard for the graphics and photographic industries.

These units meet those five conditions:

- Color quality
- Light intensity
- Evenness
- Surround
- Geometry

Accessories

These units are available with a variety of optional accessories such as storage cabinet and flat drawers for the storage of artwork, press sheets and color proofs. Available with dual light sources (D50 and D65).

CVX-4/FD

Other Models Available

We offer a selection of color viewing stations with smaller viewing areas as well as various light sources, and we also provide units made to order for specific applications.
