

# IBF5000 IMAGE DELETION PEN

## Eliminate the need to remake plates, saving time and money

The new IBF5000 image deletion pen was specifically developed for use on the Million DV, Negfast, Eco-T and Million SR plates manufactured by IBF.

The pen effectively removes unwanted images, and will save you time and money by eliminating the need to re-make plates. It is made with the same exacting specification as the other popular deletion pens we offer.

### Features

- Effective on IBF Million DV, Negfast, Eco-T and Million SR plates
- Incorporates a medium tip and a unique broad chiseled tip in one pen
- Broad chiseled tip can be positioned at different angles to accurately delete images of various sizes
- Quality construction of barrel, end caps and tips reduces evaporation, thereby extending the life of the pen
- Durable, nylon tips for long lasting performance
- Easy and convenient to use
- Permanently eliminates the image
- Used for long runs

Model IBF5000 - packaged 1 each

### Other Available Pens

We also offer the CTP-1000 image deletion pen and the CTP-2000 image addition pen for CtP plates. Also available from us are the FBP3000 deletion pen for Fuji thermal plates and the KP4 deletion pen for Kodak thermal plates. Please see our product specific brochures for more information on these products.
