

INK DUCT FOILS

Manufactured to OEM Specifications

Manufactured to the highest standards, our ink duct foils are made from durable, long-lasting polyester material that is .007"/.19mm thick. They are permanently formed to the original equipment manufacturer's specifications to assure an exact fit. Tested using both conventional and UV inks, these liners offer maximum chemical resistance to reduce ink duct contamination.

We offer a complete line of ink duct foils for Heidelberg presses incorporating the CPC color measuring system. Our exact fold quality and precise cutting guarantee easy installation. The top quality polyester material from which they are made insures resistance to chemical, mechanical and thermal press conditions to insure a long life.
