

# ELIMINATOR INK ADDITIVE

***New ink additive developed for porous stock to allow faster printing without messy spray powders.***

This product eliminates the need for spray powder, minimizes down-time waiting for the ink to dry and avoids producing a rough feeling on the printed sheets. Best of all, ELIMINATOR works with all types of oil-based inks, including acrylic, soy, laser/thermal and rubber-based.

ELIMINATOR prevents the undesirable transfer of ink from the printed side of a sheet to the underside of the next sheet in the delivery. It dries the ink from both the top down and the bottom up. The fountain solution activates ELIMINATOR to make jobs dry faster. ELIMINATOR will not shorten the period of time that ink can remain open in the ink train, and will optimize the inking distribution.

## **Benefits**

- Works on any porous paper stock
- Allows more sheets to be printed per pound of ink

- Produces more saleable sheets
  - Does not adversely affect inks
  - Faster drying allows for faster job turn-around
  - Works well with metallic inks and overprint varnish
  - Prevents set-off (the transfer of ink from one sheet to the next)
  - Improves the printing of solids and halftones
  - Reduces ink tack without adversely affecting the ink body
  - Works with all oil-based inks
  - Helps stop build-up of ink on the plate, rollers and blanket
- Directions**  
Mix .5-1 oz./14-28 grams of ELIMINATOR to 1 Lb./1.45 kg of ink.
- Packaging**  
Container 2 Lbs./9 kg (15/case)  
Container 8 Lbs./3.6 kg (6/case)  
Pail 35 Lbs./15.8 kg  
Drum 400 Lbs./181 kg
- Works with any dampening system, conventional or integrated
  - Optimizes inking distribution
