

BLUE GLASS®

anti-marking film

Important Characteristics of BLUE GLASS®

High-quality printing and coating applications in today's highly competitive printing industry demand the best in marking protection. When it comes to protecting the wet side of the printed sheet using textured surfaces, nothing is better than **BLUE GLASS®** anti-marking film.

- Reduces Marking
- Reduces Build-up
- Long-Lasting
- Easy Installation

When service counts, count on Grafitec.

BLUE GLASS® anti-marking films

High-quality printing and coating applications in today's highly competitive printing industry demand the best in marking protection. When it comes to protecting the wet side of the printed sheet using textured surfaces, nothing is better than **BLUE GLASS®** anti-marking film.

Reduces Markings

The unique construction of this anti-marking film reduces marking problems associated with ink and coating build-up on the surfaces of the transfer positions. When used with **SUPER BLUE 2®** anti-marking anti-static systems, your entire press becomes a mark-less zone.

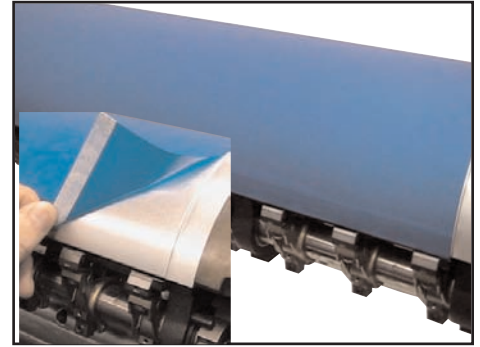

Reduces Build-up

Engineered with exact tolerances, the microscopic glass beads in this anti-marking film are designed to reduce surface contact with the freshly printed substrate and to reduce the build-up of coating, varnish and ink on its surface.

Long-Lasting

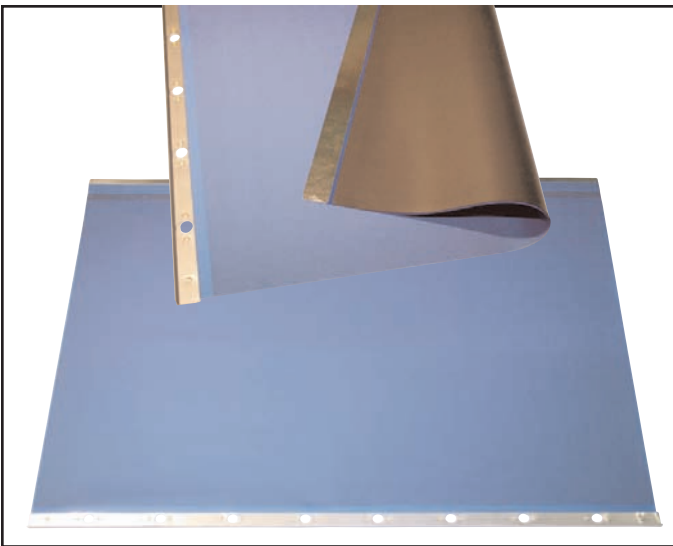

Its uniform surface provides even support across the entire substrate. The film is remarkably flexible and will maintain bead adhesion even under the most intense stress.

Easy Installation

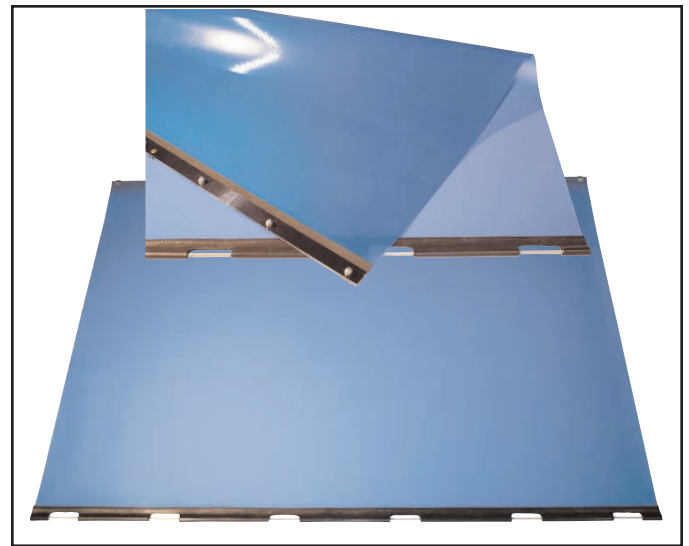

Adhesive strip application

BLUE GLASS® anti-marking film is easy to install: depending on the type used, either apply the specially formulated adhesive strip directly to the clean cylinder surface or fasten the jacket directly into the cylinder clamps. As needed, unclamp it or peel it off, and replace it with a new one.

Heidelberg SM74 converted jacket

Heidelberg SM102 converted jacket

This product is available in micro, small and large bead grades, adhesive or non-adhesive rolls, cut sheets and converted jackets.
