

POLYESTER PRESS PACKING

Polyester press packing material with or without adhesive

Polyester press packing without adhesive is used to compensate for variations in the thickness of blankets, plates and paper stocks.

We also offer polyester press packing with a light adhesive: its low-tack adhesive allows for easy repositioning, eliminates creeping and can be removed easily and cleanly from the cylinders.

Characteristics

- Will not absorb water, blanket wash nor fountain solutions
- Stable and resistant to chemicals
- Will not swell nor shrink
- Reusable and longer-lasting than paper packing
- Reduces downtime caused by blanket problems
- Prolongs blanket life
- Uniform thickness across any length or width
- Virtually indestructible
- Easy to cut to size

Formats

Available in a wide selection of standard sizes and can be cut to a specific format.
