

ANTI-STATIC POLYESTER

Polyester Base for Graphic Arts Applications

Clear polyester base used for stripping, overlays, layout base and other general applications in the printing and graphic arts industry.

Anti-static

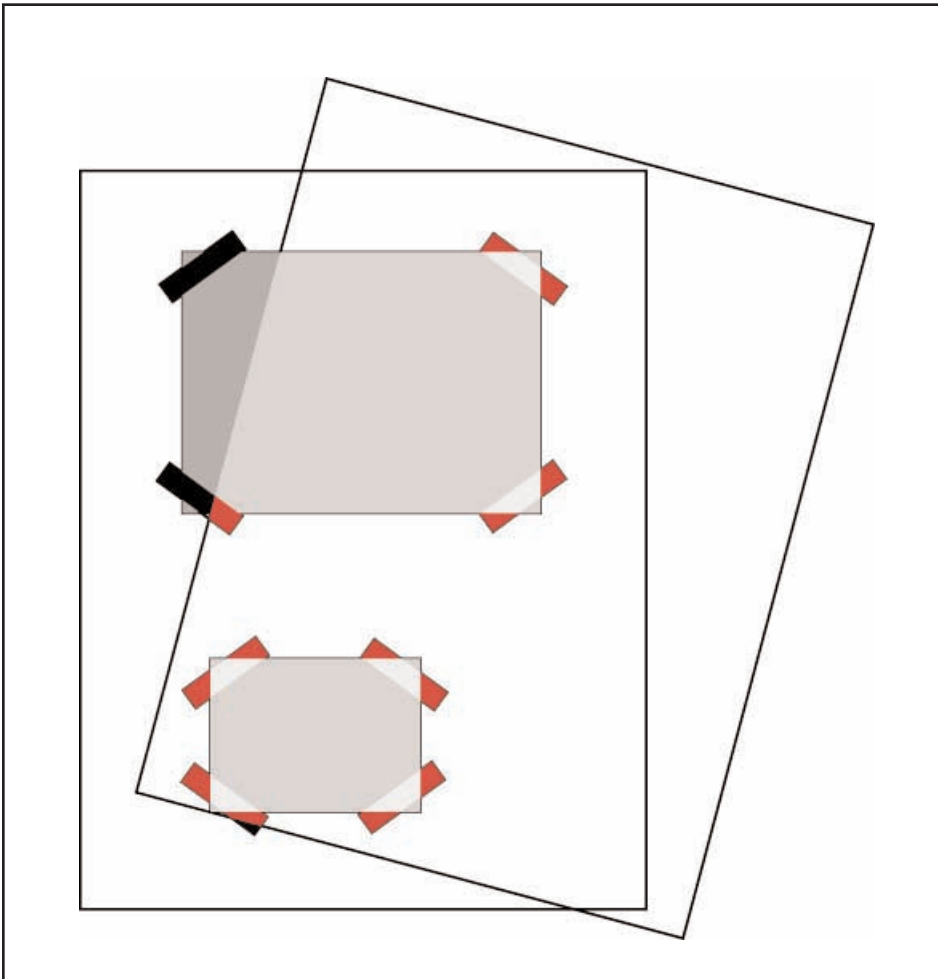

The polyester has an anti-static treatment on both sides to repel dust and lint. The anti-static coating also eliminates static build-up and discharge.

Characteristics

- High clarity, low haze for accurate registration
- Dimensionally stable so it lays flat and stays flat
- Strong, to prevent tearing or ripping
- Temperature resistant so it will not shrink nor stretch
- Provides superior tape adhesion
- Excellent handling properties
- Easy to cut
- Superb aging properties to stay clear and store well

Sizes

Available in thicknesses of .004"/.1mm, .005"/.125mm and .007"/.175mm, and in standard sheet sizes from 11x14"/28x36cm to 106x137cm/42x54", with custom cut sizes available for specific requirements.

When service counts, count on Grafitec.
