

JOMAC FORM AND DUCTOR COVERS

Synthetic Products for Web and Sheetfed Presses

For more than 20 years, Jomac® has led the industry in the production of high quality, seamless, synthetic roller covers. With Greensleeves™, Watersleeves™ and the other covers in the line, they have proven that lint-free, uniformly absorbent synthetic covers can produce sharper dots and better dampener control, job after job. Long-life, resistance to ink build-up and easy cleaning are also characteristics of these products, making Jomac synthetics the standard of the industry, all around the world.

Greensleeves

For the waterform or ductor roller of web and sheetfed presses, Greensleeves is a premium quality, shrink-fit cover with synthetic fibers that are lint-free and that carry water controllably and consistently. This is a long-life cover which resists ink build-up and cleans easily. Greensleeves can be ordered in rolls of 10 or 25 yards/9.1 or 22.8m, or in pre-cut sizes for smaller presses and duplicators. Available outside diameter sizes are .875-3.5"/22-89mm.

Watersleeves

For the waterform roller of sheetfed and web presses, Watersleeves is a shrink-fit, lint-free alternative to paper sleeves. Specifically designed to improve dot sharpness, the synthetic construction of Watersleeves is non-patterning, resistant to ink build-up and easy to clean. Watersleeves are custom-made with drawstrings to fit your press, and are also available in rolls. Available outside diameter sizes are 1.18-3.94"/30-100mm.

Cotton Products for Web and Sheetfed Presses

When Jomac introduced a brand new circular-knit material in 1938, they started a revolution. Since that time, they have improved and expanded their line of pure cotton products to where it is easily the largest and best available; for many customers, only a genuine Jomac cotton cover will do. The legendary quality that helped build their worldwide reputation will continue to be included in every roller cover they make.

A-Tex

For the waterform or ductor roller of sheetfed and web presses, A-Tex® is the original seamless dampener cover. This bleached, absorbent, cotton-looped fabric provides consistent performance on most medium and large presses. Available in 25 yard/22.8m rolls or in pre-cut sizes for smaller presses and duplicators. Outside diameter sizes are available to 6.25"/159mm.

Uni-Damp

For the waterform or ductor rollers of small sheetfed presses, Uni-Damp® has a uniformly sheared surface that gives a velvety, velour-smooth finish. This finish also provides maximum moisture control in absorption and transfer. Available in 25 yard/22.8m rolls or in pre-cut sizes for smaller presses and duplicators. Available outside diameters are 1.125-3.3125"/29-84mm.

J-Knit

For fast color changes on web or sheetfed presses, the versatile J-Knit cover is ideal. It simply slips over the existing cover and is removed at the end of the run. Available in 25 yard/22.8m rolls, with outside diameters of 3.5-4.75"/89-121mm.

J-Lastic

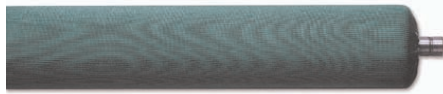

For water pan, fountain or intermediate ductor rollers, J-Lastic is an elasticized cotton cover that is highly absorbent and an excellent alternative to linen covers. Available in 25 yard/22.8m rolls, with outside diameters of 1.875-5"/48-127mm.

Newspaper Products

Jomac has provided newspaper pressrooms with a steady stream of new ideas to keep quality up and costs in check for many years.

For newspaper applications we recommend Greensleeves and A-TEX as well as the following products.

GSS News-Knit

GSS News-Knit® is a premium quality, shrink-fit cover for water pick-up rollers on web offset newspaper presses. Its synthetic fibers make it lint-free, long-lasting and uniformly absorbent, offering consistently high performance, along with excellent resistance to ink build-up, and it is easy to clean. Available in rolls of 13 yards/12m to fit the rollers of most popular presses. Available outside diameter sizes are 2.75-3.125"/70-79mm.

News-Knit

For the water pick-up rollers on web offset newspaper presses, News-Knit is a durable, dense, highly absorbent, medium-weight cotton cover. Available in 25 yard/22.8m rolls and for roller diameters of 1.75-6"/44.45-52.4mm.

Bild-Up

Designed for water pick-up rollers on web offset newspaper presses, lightweight cotton Bild-Up is durable, dense and highly absorbent. Available in 25 yard/22.8m rolls, with outside diameters of 2.125-3.25"/54-83mm.

Speciality Products

Zip Knife

This is the safe, simple way to remove old dampener covers without damaging the delicate surface of the roller beneath. It works on cotton and synthetic materials and on wet or dry covers.

Slip-on Tubes

This device makes fitting a new roller cover a breeze. Simply slide the cover over the tube, slide the tube over the roller and transfer the cover. Available in a variety of sizes to fit all popular rollers for large and small presses.
