

WASH-UP BLADES

Wash-up blades manufactured to OEM specifications

Printers demand the highest performance from each part of their printing press. We provide a wide range of replacement wash-up blades that provide excellent performance in all conditions. They offer a strong chemical resistance to aggressive inks and solvents, and have proven their high quality both to the original equipment manufacturers and to end-users.

- Manufactured to OEM specifications
- Quick wash-up performance
- Specially formulated rubber, plastic and other specialty materials ensure maximum performance and wear resistance
- Unique bonding process between metal and rubber to prevent bond failure
- Sharp and perfectly straight wiping edge
- Specially treated metal for maximum corrosion resistance
- Safe metal parts so that there are no sharp edges nor burrs
- Wash-up blades are available for every press in your shop: we can quickly provide any custom requirement or special order

When quality and service count, count on Grafitec.
