

PANTALL GRAPHIC ARTS PENS

Our no-pump design eliminates tip flare-out and tip damage. Pantall pens allow you to work more accurately with an even solution flow that dries almost instantly and never becomes tacky. The opake will not crack or peel.

F Our most versatile pen with a fine point for opaking pinholes and for general cover-up work. This is our most popular pen.

UF This ultra-fine point is perfect for opaking pinholes and those tight spots.

PF This .003mm point is ideal for silhouetting film and for tracing/ruling on positive film. The unique hard tip eliminates flare-out.

A **Hi-Density formula** designed for special application when the highest possible density is required:

RHD-F Red solution with a fine point. Ideal for long exposures common in screen printing.

RHD-M Red solution with a medium tip. Incorporates a special chisel tip which can be turned 90° to opake a large or small area.

BHD-F Black solution with a fine point. Ideal for long exposures common in screen printing.

BHD-M Black solution with a medium tip. Incorporates a special chisel tip.

The **Opake Brush** pens incorporate a brush-style tip. The solution is a high-density opake that can be applied easily and dries quickly. A large or small area can be opaked by changing the angle of the pen on application.

RB The handy brush-tip design with red solution.

BB Brush-tip design with black solution.

Opake-Line pens are ideal to draw silhouettes around images on negatives or to draw with a rule or compass on positive films. They are used to opake difficult-to-reach areas and they contain a high-density opake. Available with .01, .03 and .05mm tips, and your selection of red or black opake.

R1 Red solution with a .01mm point.

R3 Red solution with a .03mm point.

R5 Red solution with a .05mm point.

B1 Black solution with a .01mm point.

B3 Black solution with a .03mm point.

B5 Black solution with a .05mm point.

UW The 19mm/.75" tip is made for wide area block-out work. Available with red solution only.

Blue Marker Use this pen to make any notes, images or drawings on positive file. The blue image made with this pen will not affect the exposure.

The **Platon Plate Image Deletion** pens are used to delete unwanted images from all metal plates, including CTP (computer-to-plate) coatings and fast exposure plates. Available with a fine tip or chisel tip to accurately delete various sized images by changing the angle of the tip. The quality construction of the barrel, end caps and tips reduces evaporation, extending the life of the product. The solution contains no toxins and is nonflammable, a user- and environmentally-friendly solution.

Platon F Fine point.

Platon L Chisel tip which can be turned 90° to work in large or small areas.
