

EE-ZZ ROLL-OFF

An Exceptional Roller and Blanket Cleaner

EE-ZZ Roll-Off is a high-quality cleaner that facilitates color changes and maintenance of offset presses. It is specifically recommended for short runs and frequent color changes.

Benefits

- EE-ZZ Roll-Off is a special cleaning paste for quick color changes
- Easy to handle
- May be used as a weekly or bi-weekly cleaner to prevent glazing
- Shortens the wash-up time on press
- Reduces wasted sheets to reach color acceptability, increasing productivity
- Extends roller life as it does not contain grit of any kind nor VOC's to damage or swell the roller
- Deep cleaning and deglazing action restores optimum ink distribution
- Improves print quality
- Prolongs the useful life of rollers and blankets

VOC

Does not contain VOC

Directions

Apply a liberal amount of EE-ZZ Roll-Off with an ink knife after the wet ink has been removed from the roller train with a quality roller and blanket wash. Allow EE-ZZ Roll-Off to penetrate into the roller pores by running the press at idle speed for several minutes to ensure the deglazing of the roller.

Engage the wash-up blade or use clean-up sheets and follow one of the following steps:

- **Fast Wash-Up** Flush the roller train with warm water until the residue is removed.
- **Maintenance Wash-Up** Follow the Fast Wash-Up instructions until the residue is removed, followed by a final wash-up with a quality roller and blanket wash.

Packaging

Container 2 Lbs./.91 Kg. (8 per case)

Pail 10 Lbs./4.54 Kg.
