

PUTZ POMADE

The Original Roller and Blanket Cleaner

Putz Pomade is a roller and blanket cleaner and conditioner for use on offset, web, rotogravure, proof and letterpresses. It is also an excellent cleaning agent for rotogravure cylinders. Available as a paste or liquid.

Benefits

- Designed to be used while the press is inked
- Works well even with black or yellow inks
- Shortens the wash-up time on press by up to 50%
- Reduces wasted sheets to reach color acceptability, thereby increasing productivity
- Works well with clean-up sheets
- Improves print quality
- Stops the glazing and stripping process of rollers
- Deep cleaning and deep deglazing action restores optimum ink distribution
- Removes dried-up crystallized ink from rollers, thereby improving their affinity for ink
- Rejuvenates and reconditions blankets and rollers
- Keeps rollers in perfect condition with regular use
- Nonflammable and not harmful to skin
- Established, proven product that really works

VOC

6 Lbs. per gallon/716 grams per liter 5.5%

Directions

Shake well. Can be applied while the press is still inked.

For Color Changes and Rollers Remove the plate prior to cleaning the rollers. Apply a thin bead to the feed roller and idle the press for a few minutes. Clean up as usual. Thoroughly remove all Putz Pomade during clean-up.

For Blankets Apply Putz Pomade to a cleaning pad. Wipe the blanket in a circular motion and clean up as usual.

Packaging

Liquid Bottle 15 oz./444 ml (6 per case)
