

# AQUA BLUE

## *Cleaner, Conditioner and Scratch Remover for Aqueous Metal Plates*

Aqua Blue® is an amazing cleaner, conditioner and scratch remover for aqueous metal plates, such as Fuji, Western/Lastra, Kodak and Enco. Aqua Blue makes your printing look better and saves you money by extending the life of your plates.

### **Benefits**

- Quickly removes ink, scum, light scratches, gum and oxidation
- Makes plates more ink-receptive
- Desensitizes plates for longer, higher quality runs
- Excellent for “on the fly” cleaning
- Provides sharper images and prolongs the life of the plates

### **VOC**

1.9 Lbs. per gallon/227 grams per liter  
25%

### **Directions**

Shake well and apply to the entire plate with a dampened sponge or cloth. Apply liberally. Rinse with clean water or with a fountain solution mixture, and resume printing. Repeat as necessary.

Directions for “on the fly” cleaning: spray directly on the plate while the press is running to remove piling, plugging and scumming.

### **Packaging**

Bottle 32 oz./946 ml (12 per case)  
Drum 55 gallons/208 liters  
Product must be mixed well before bottling
