

Chrome Cylinder Cleaner and Desensitizer

This one-step cleaner and desensitizer makes press clean-up faster and easier. C.C.C.'s protective coating will stop ink build-up, stains, paper lint and other miscellaneous contaminants from adhering to chrome impression cylinders. Use C.C.C. on chrome impression cylinders, chrome dampener rollers, transfer cylinders, bearers and metering rollers. Technicians who represent leading press manufacturers use and recommend this product for their presses.

Benefits

- Easy to use: just wipe on and leave on
- Keeps the water train clean
- Increases dampening control
- Cleans, protects and desensitizes
- Prevents ink from sticking: C.C.C. makes chrome receptive to water and repels ink
- Prevents oxidation and extends the life of chrome components
- Desensitizes metering rollers
- Allows the press to run at peak performance

VOC

1.69 Lbs. per gallon/44 grams per liter
20.27%

Directions

Shake well. Start with a clean press and apply C.C.C. to clean chrome rollers and cylinders. Allow C.C.C. to dry and do not remove the protective haze as the protective coating will not contaminate the ink nor fountain solution. To clean up, simply wipe down the cylinders at the end of the day. C.C.C. eliminates scraping. Reapply after cleaning.

Packaging

Bottle 32 oz./946 ml (12 per case)
Drum 55 gallons/208 liters
Product must be mixed well before bottling
