

DRY ROLLER LUBRICANT

Protect the Non-Printing Units of Your Press

Dry Roller Lubricant was designed specifically to protect the non-printing units of a multi-unit press during a press run.

Benefits

- Easy to apply
- For use with all oil-based inks
- Eliminates friction created by running dry rollers
- Prevents heat build-up that can damage rollers
- Helps eliminate stripping problems
- Extends the life of the rollers
- Lubricates and conditions non-printing rollers
- Will not swell roller coverings
- Will not burn off from heat
- One application will run indefinitely and washes off with roller and blanket wash
- Dry Roller Lubricant UV also available for use with UV inks

VOC

Does not contain VOC

Directions

Apply full strength to the upper rollers of a non-printing unit and allow full distribution throughout the roller train. Wash off with a blanket and roller wash when ready for printing.
