

PLATE CARE

Metal Plate Finisher, Cleaner and Preserver

Plate Care is compatible with all metal plates, including CTP thermal and violet. It is a one-step product which thoroughly cleans and finishes the plate surface. It protects the plate from oxidation during storage and may be used to clean plates on the press. Removing Plate Care is simple: just wipe the plate with a damp sponge or soft cloth.

Benefits

- Cleans, finishes and preserves all metal plates
- Easily removed with water
- Tested and approved by leading plate manufacturers
- Low VOC
- Saves money because there is no need to stock additional cleaners or gums
- Eliminates plate blinding
- Plates roll up faster
- Assurance of product compatibility
- Safe and environmentally friendly product

VOC

1.02 Lbs. per gallon/121.5 grams per liter
12.15%

Directions

Shake before using. Apply evenly to the entire plate using a cotton pad, cheesecloth or damp sponge. To preserve a plate, buff dry and store. To remove Plate Care, just wipe the plate down with a damp sponge or cotton pad.
