

GRAPH FLO X-5000

Premium Alcohol Replacement Product

Graph Flo X-5000 was specifically formulated to reduce or eliminate the alcohol used in lithographic press dampening systems. This product is compatible with all fountain solutions and printing blankets and is designed to provide a wider range of wetting capabilities in even the most complicated dampening system. Graph Flo X-5000 assists in increasing water viscosity throughout the dampening system.

Benefits

- Non-aggressive to all soft-polymer CTP printing plates, to UV or hybrid inks, to positive unbaked plates
- Increases water viscosity
- Does not affect conductivity
- Improved ink/water balance
- Reduces water surface tension
- No build-up on ink rollers
- Cleaner recirculating tanks
- Low dosage reduces cost
- Improved plate protection

VOC

6 Lbs. per gallon/716 grams per liter

Directions

Add 1/2 oz. per gallon/3.9 ml per liter of working fountain solution. Gradually increase the amount until the optimum mixture is achieved but do not exceed 4 oz. per gallon/31 ml per liter.

Packaging

Bottle 1 gallon/3.8 liters (4 per case)

Pail 5 gallons/19 liters

Drum 55 gallons/208 liters
