

CLEAR AND UV-BLOCKING TUBE GUARDS

EncapSulite® offers several products to create a secure environment and eliminate hazardous UV rays:

- Clear TubeGuards
- TubeGuards with UV-blocking Properties

Clear TubeGuards

The TubeGuard Kit consists of a clear polycarbonate safety sleeve that easily slips over the lamp, and safety end caps made from a clear high-heat polyethylene material. These kits can be used with fluorescent lamps purchased locally. In the event of breakage, the TubeGuard is designed to contain shattered glass fragments and phosphors. TubeGuards are ideal for safety use in food processing areas, restaurants, printing plants, stores, offices, warehousing areas, factories and wherever public safety is a concern. Available in T8 (25mm/1") and T12 diameters (38mm/1.5"). Not for use with VHO lamps.

T12 Clear TubeGuard Kit		
Model	Tube Length	Quantity/Box
48SST12	122cm/48"	24
60SST12	152cm/60"	24

96SST12	244cm/96"	24

T8 Clear TubeGuard Kit		
Model	Tube Length	Quantity/Box
48SST8	122cm/48"	48
60SST8	152cm/60"	48
72SST8	183cm/72"	48
96SST8	244cm/96"	48

TubeGuards with UV-blocking Properties

Invisible UV rays from the sun and artificial sources such as fluorescent lamps cause great damage to displays, paintings, books, watercolors, wood and fabrics. UV radiation will gradually induce fading, deterioration of organic materials and damage to colors and fibers. UV emissions can also cause health problems: UV radiation is linked to a number of skin, eye and psychological problems. TubeGuards with UV-blocking properties offer a solution to such problems.

These TubeGuards with UV-blocking properties easily slip over a T8 or T12 white fluorescent lamp purchased locally. The kit is complete on positioning the two end caps, and the assembled kit is placed in a common light fixture. This is the perfect solution for applications where white light is required but UV rays are to be blocked. Not available for use with HO- or VHO-type lamps.

T8 and T12 UV-blocking TubeGuards
