

EVS-2028 COLOR VIEWING STATION

EVS-2028 Desktop Model

Model EVS-2028 is the smallest viewer in the executive viewing station product line with viewing area of 20x28"/51x71cm

The EVS-2028 provides all of the outstanding features of a full-sized EVS unit, yet it fits on a desktop or countertop. The EVS-2028 is the ideal solution for critical color evaluation of smaller format images and complies with industry D50 standard lighting and viewing conditions, ISO 3664:2000.

This unit is perfect for the professional involved in inspecting color prints, proofs and transparencies, or for small press applications. These compact desktop viewing systems are available in models that offer only reflection viewing or a combination of transmission/reflection viewing.

Built-in Quality Control

LiteGuard II®, a critical quality control monitor, is a backlit liquid crystal display of lamp hours used and lamp hours remaining on the daylight source. The LiteGuard II also displays warm-up time and hours remaining until relamping is recommended.

Graphiclite 100 Lamps

Every GTI® color viewing system features Graphiclite® 100 color viewing lamps. To ensure optimum viewing conditions, these lamps are manufactured with a unique blend of fluorescent phosphors. Unequaled by any other 5000 Kelvin lamp in the industry, the Graphiclite 100 produces a true full-spectrum white light which renders colors with the highest degree of accuracy and efficiency. In GTI viewers, the Graphiclite 100 color viewing lamp produces an actual system CRI approaching 95.

Two EVS-2028 with two TS2028, SW-2028 and JK-2028

Characteristics

- Elegant design
- Compliance with industry D50 standard lighting and viewing conditions, ISO 3664:2000
- Uniform illumination
- Graphiclite 100 color viewing lamps
- Munsell N8/grey surround
- High-efficiency reflectors
- Neutral diffusers that will not yellow
- Ships disassembled to reduce freight charges

Units are shown here with a variety of options (stands, sidewalls and storage drawers). They are also available with GLX transparency viewers in a selection of formats.
